### How we work with your organization

#### Manufacturing Process

We offer environmental, health and safety and information security management system or e-waste certification as well as energy and emissions reduction management. We can support you through the product development process with product environmental optimization and packaging.

#### Procurement and Supply Chains

We can work with you to identify your supply chain ESG hotspots, perform risk assessments, track data in the supply chain, conduct Supplier assessments/audits and value-chain GHG emissions (Scope 3) measurement.

#### Research and Development

We conduct life-cycle assessments and can support you with e-waste recycling, safer chemistry and toxicology services.

Plus more!

Contact us today to get started with your ESG journey.
